Robert Wesley Hardin when only twelve years of age helped in driving a bunch of hogs across the Allegheny Mountains from Virginia into Kentucky. He never returned to his native state, but for a period of thirty-five years made Kentucky his home. He then moved with his family to Illinois in 1854 and settled in Menard County, eighteen miles north of Springfield, where he lived for twenty-seven years till the time of his death in 1881.

His wife having died in 1859 he was married a second time to Elizabeth Coffman who outlived him.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$ . It is shown that the system (1) has solutions for arbitrary values of the parameters  $\alpha$  and  $\beta$  if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are unique and are given by the formulas (2).

2. In the second part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (3).

3. In the third part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (4).

4. In the fourth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (5).

5. In the fifth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (6).

6. In the sixth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (7).

7. In the seventh part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (8).

8. In the eighth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (9).

9. In the ninth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (10).

10. In the tenth part of the paper the problem of the stability of the solutions of the system (1) is considered. It is shown that the solutions of the system (1) are stable with respect to the initial conditions if and only if the condition  $\alpha + \beta = 1$  is satisfied. In this case the solutions are stable with respect to the initial conditions and are given by the formulas (11).
